# DANCING ON THE FLOOR

## Creativity without limits

Door stoppers are the start of a new dance for Viefte. Their addition helps us to widen our range of accessories and explore a part of the world of decorative surroundings which we hadn't yet discovered: floors for all types of surroundings. Our objective is to fill them with design and enhance their image taking it to the next level.

Our door stoppers set physical limits, but not creative limits. They protect and surprise. They add style whilst helping to avoid banging doors. Created to be seen, they make floors become part of the design in tune with the rest of the space. They are characterized by their resilience. They can be differentiated by their shapes. And they can be defined by their creativity.

# ARPA WALL

## Functional geometry

The design of the Arpa Wall door stoppers, created by Viefe Studio, is heavily influenced by the first globally recognized decorative style: the artistic and architectural movement known as Art Déco, established in the 20th century in the 1920's and based on geometric shapes, made with industrial materials. Despite its design being a throwback to history, it continues to be one of the most widely acclaimed styles in current decorative trends.

*Far from being a conventional door stopper, Arpa Wall is installed onto the wall in the area where the door makes contact, providing a smooth and resistant surface to cushion the impact.*

Elegant and lasting, this aluminum door stopper is the perfect choice to add style and provide protection for both doors and walls.

Model N°: 8013

Material: ALUMINIUM

Designer: VIEFE STUDIO

Finishes:

BRUSHED DARK BRASS

RUSTIC BRASS

STAINLESS STEEL LOOK

BRUSHED BLACK

Diameter: 50 mm / Length: 100 mm

Fixation with screw or adhesive

*Brushed dark brass*

*Rustic brass*

*Stainless steel look*

*Brushed black*

Technical info on page 34

## In line with recent trends

The straight lined and symmetric aesthetic of the Arpa series is influenced by the Art Déco style which made a significant breakthrough in the second decade of the twentieth century and which has come back into fashion nowadays. Viefe Studio has based its design on the geometry, the elegance, the use of industrial materials and metallic finishes characteristic of this artistic movement, in order to create the elegant Arpa door stoppers.

Easy installed, elegant and long-lasting, the Arpa aluminum door stopper is the perfect choice for adding style and providing protection for both doors and walls. The version of the Arpa wall door stopper is also available and can be combined with different products from the same range (handles, knobs and wall hooks).

# PUK

## Artistic circles

The reinterpretation of Yayoi Kusama's iconic circles by Kaschkasch when creating the Puk door stopper is a demonstration of how art and design can find synergy to create unique pieces. In this case, the German design studio has captured the essence of Kusama's work which is characterized by the use of repetitive patterns of spots and circles. Puk takes the functionality of door stops to a new dimension.

*Puk is a piece of decoration in itself. With its ability to be fitted to all types of floors by the use of an adhesive, it is an easy option and really practical to install.*

The Puk door stopper boasts the use of a rubber suspension mechanism which reduces the sound made when closing the door. In addition, as it is made using an organic material, in this case wood, this allows you to create interesting visual effects in any type of space.

## A sporty and modern design

Inspired by all-terrain buggies and their capacity for adaptation and resistance, the German studio Kaschkasch has created the Buggy door stopper. With its curvy aerodynamic design, Buggy presents a modern and sporty look capable of withstanding the strongest of impacts and also being resistant to the passing of time.

# LOW

## A resounding homage to DJ culture

Vinyl discs and CDs have seen the birth of new genres and the growth of numerous DJs who have influenced the music scene for decades. Inspired by the circular plates on the mixing desks, the designer Hector Diego has created the Low door stop which pays homage to the impact of DJ culture and the creative arts.

The flat circular shape of the Low door stop means it is totally discreet, but capable of making a difference to any type of space.

*The anti-collision black elastic band protects against strong impacts.*

# GRAF

## Elegant industrial minimalism

Maintaining its minimalist industrial identity, Viefe Studio has been inspired by the mesh and architectural structures which distinguish the large foundries, such as those in San Francisco, to create the Graf door stopper.

Model N°: 8009

Material: ALUMINIUM

Designer: VIEFE STUDIO

Finishes: STAINLESS STEEL LOOK  
BRUSHED BLACK  
BRUSHED DARK BRASS

Diameter: 27 mm

Height: 28 mm

Fixation with screw

Its simple and elegant design means it can adapt to any type of decoration, giving a longer life to doors and walls by preventing any type of strong impact.

Technical info on page 35

*The Graf door stopper can be combined with knobs, handles and wall hooks from the same line in order to achieve a surrounding with a harmonious image through the use of details.*

# VIEFE SERIES

*better together*

## There are things which work better together

Our decorative accessories for example. This is where the origins of the Viefe series comes from which encompasses products from all our lines under the same design: **knobs, handles, wall hooks and door stoppers**. We create them thinking about integrated design projects which seek to create a harmonious atmosphere using accessories with a common style.

*Each Viefe series brings a singular concept to its space.*

*The Arpa handles are accessories with an industrial aesthetic which add character to furniture and their surroundings.*

*The Arpa wall hooks allow you to create sophisticated compositions on any type of wall.*

# ARPA

serie

*Modernity, versatility and elegance are the characteristics which make the accessories from the Arpa series ideal for interiors which seek exclusivity as regards the types of finishes used and excellence in their quality.*

## A rustic brass finish, the vintage counterpoint

**The dark tones of the new rustic brass finish are inspired by the sobriety and forcefulness of antique brass objects and are characterized by their antique look which suggests a certain feeling of nostalgia for the past. The rustic brass finish is an interesting option to add singularity to any type of modern environment as it acts as a vintage counterpoint.**

# GRAF

serie

*The unique personality of the Graf series allows you to transform furniture adding sophistication and an industrial touch. All of the Graf accessories have a surface with a mesh design which, as well as having a highly aesthetic feel, guarantees a better grip.*
